The American Ordnance Association, a national society of more than 46,000 American citizens, was founded in 1919, "pledged to industrial preparedness for war as one of our Nation's strongest guarantees of peace." During the past 46 years the Association has endeavored to foster among all our people an interest in and a knowledge of the design, production, and maintenance of military armament. This it has done through periods of public lassitude and times of great national emergency. The lessons learned the hard way in World Wars I and II must be perpetuated in order that future generations of Americans may be saved the costly errors and mistakes of our mobilizations for national defense. Membership, to which American citizens are eligible, is $17.50 for three years or $7.00 for one year.
